

### **Valtronic Technologies Receives Leading Edge Award for Fourth Consecutive Year**

CLEVELAND, OH, Valtronic Technologies (USA) Inc., has been awarded the 2010 Leading EDGE (Economic Development through Growth and Entrepreneurship) Award for the fourth consecutive year. The EDGE Award recognizes a select group of middle-market companies in Northeast Ohio committed to growth and value creation. Mid-market companies now affect the region's economy as much as Fortune 500 companies.

Only mid-market companies, with less than \$750 million in annual revenue in the 17 county region served by EDGE are eligible for this award. Some of the criteria reviewed by the awarding panel include EBIT, sales outside the region, innovations that contributed to sales and community involvement. Over 1,000 companies were considered for this prestigious award; only 86 companies received it in 2010.

Jay Wimer, CEO of Valtronic Technologies accepted the award May 19th at the banquet dinner for recipients, held at the InterContinental Hotel. "Winning this award for our 2009 accomplishments is especially meaningful since the economy created tough challenges for us to overcome. I want to commend the dedication and commitment of our employees, as their hard work and ingenuity enabled us to strive forward. Staying strong this past year is allowing us to continue to build products and add to the economy of the region."

Valtronic Technologies is a full service contract manufacturer offering development and production of an entire product, from micro-electronics and mechanical parts to complete systems. We offer a full turnkey solution from design to manufacturing, and we deliver reliable services and products to innovative successful companies. Valtronic's customer list includes worldwide well-established OEMs (Original Equipment Manufacturers) and leading edge companies in both the medical and non-medical fields.
